AMENDMENTS TO THE CLAIMS

The following listing of claims will replace all prior versions and listings of claims in the application.

LISTING OF CLAIMS

- 1.-7. (cancelled)
- 8. (currently amended) A composite article comprising a gel coat layer, a laminate layer, and a barrier layer disposed between the gel coat and laminate, wherein the laminate layer comprises reinforcing fibers in a cured polyester resin and the gel coat comprises a cured polyester polyurethane acrylate resin, wherein the gel coat layer forms a surface of the article that maintains 60% or more of its gloss after exposure to 4500kJ/m² of ultraviolet radiation, and wherein the barrier layer comprises fibers having a length of 1 mm or less.
- 9. (original) A composite article according to claim 8, wherein the composite article comprises an automobile body panel.
- 10. (original) An article according to claim 8, wherein the total thickness of the article is 2-12 mm.
- 11. (original) An article according to claim 8, wherein the total thickness of the article is 3-8 mm, the thickness of the gel coat is 0.5-1.5 mm, the thickness of the barrier coat is 0.75-2 mm, and the thickness of the laminate layer is 1-5 mm.
- 12: (original) An article according to claim 8, wherein the reinforcing fibers comprise glass fibers having a length of 6 mm or greater.
- 13. (original) An article according to claim 8, wherein the laminate layer comprises a cured dicyclopentadiene unsaturated polyester resin.

Serial No. 10/623,922

14. (original) An article according to claim 8, wherein the density of the laminate layer is 1.2 g/cm³ or less.

15.-17. (cancelled)

- 18. (currently amended) An automobile body panel, comprising a cured multilayer composite article comprising:
 - a gel coat layer;
 - a laminate layer; and
- a barrier layer disposed between the gel coat layer and the laminate layer, wherein the laminate layer comprises reinforcing glass fibers in a matrix of a cured polyester resin, and

wherein the gel coat forms a surface of the body panel that maintains 60% or more of its gloss after exposure to 4500 kJ/m² of ultraviolet radiation, and wherein the barrier layer comprises fibers having a length of 1 mm or less.

- 19. (original) A body panel according to claim 18, wherein the gel coat layer comprises a cured polyester polyurethane acrylate resin.
- 20. (original) An automobile body panel according to claim 18, wherein the body panel has a class A finish.
- 21. (original) An automobile body panel according to claim 18, wherein the maximum thickness of the body panel is about 6 mm.
- 22. (original) An automobile body panel according to claim 18, wherein the maximum thickness of the body panel is about 4 mm.
- 23. (original) An automobile body panel according to claim 18, wherein the gel coat has a thickness of 0.5 1.5 mm.
